

DNB FUND TMT LONG/SHORT EQUITIES RETAIL A (EUR)

ISIN: LU0547714526. BLOOMBERG TICKER: CARTMTE LX. WKN: A1CWC1

Fund Objective and Policy

The fund takes long and short positions primarily in equities of or in derivative contracts principally related to equities of companies operating in or associated with the communication services and information technology sectors. Geographically, the fund has full flexibility.

The majority of the fund investments will be components of or be securities with similar characteristics as the securities in the fund benchmark. The Investment Manager may use its discretion to invest in securities not included in the benchmark in order to take advantage of specific investment opportunities.

The fund engages in forward foreign currency exchange contracts in order to hedge the assets of this fund against currency fluctuations. The fund will aim to hedge the performance of the classes not expressed in EUR to replicate the base currency performance of the fund on a best effort basis.

Fund vs. index performance

Past performance does not predict future returns.

Performance disclaimer

The performance quoted is past performance and is not a guarantee of future returns. Future returns will e.g. depend on market developments, the manager's skill, the fund's risk, as well as the costs of subscription, management and redemption. The principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance: www.dnbam.com

Exclusion criteria (negative screening)

In addition to norms-based screening, the fund avoids investing in companies operating in:

- Coal ≥ 30% of revenues + Absolute criterion
- Oil sands ≥ 30% of revenues
- Controversial weapons
- Tobacco (production)
- Pornography (production)
- Cannabis for recreational use

[DNB standard for responsible investments](#)

[Excluded companies](#)

Voting

A way of influencing companies in a positive direction is by voting at general meetings. Our voting guidelines for Norway state that we shall vote at all Norwegian general meetings for listed companies we have ownership in, and we have adopted a systematic approach to determining which global companies meetings we will vote at.

Standard setting

Standard setting is an important element of active ownership. As part of this, we develop and publish expectation documents within important areas, which we use to contribute to the improvement of standards in the market, and to form the basis of engagements with companies:

International Norms and standards

ESG data is incorporated into the portfolio management system, and is used to assess ESG risks and opportunities in investment decision-making.

Dialogues

Company dialogues may be undertaken to discuss specific ESG incidents (reactive), or to improve companies general performance in regards to ESG risks and opportunities (proactive).

The detailed Responsible Investment Policy and the Corporate Exclusion List are available at: <https://dnbam.com/en/responsible-investments/esg-overview-dnb-funds>

Water

Anti corruption

Climate change

Environment

Human rights

Tax

Gender equality

Oceans

Biodiversity

DNB FUND TMT LONG/SHORT EQUITIES RETAIL A (EUR)

ISIN: LU0547714526. BLOOMBERG TICKER: CARTMTE LX. WKN: A1CWC1

Risk considerations (Generally speaking, every investment presents a risk of loss of capital.)

Company risk

The risk that something will happen to one or more companies in which the fund have invested causing those investments to lose value.

Liquidity risk

The risk that one or more of the funds investments could become hard to value, or to sell at a desired time and price.

Concentration risk

The risk that a negative event or shift in a particular sector or geography to which the fund's investments are exposed causing those investments to lose value.

Derivate risk

The risk that certain derivatives could behave unexpectedly or could expose the fund to losses that are significantly greater than the cost of the derivative.

Systematic risk

The risk that e.g. an economic shocks or political instability in the market in which the fund invests causing all of the fund's investments to lose value.

Sustainability risk

The risk that the occurrence of an environmental, social or governance event would exert material negative impact on the value of a given investment and result in value fluctuation.

Further investment risks are set out in the risk warnings chapter in the prospectus.

Glossary

Cut-off

Deadline for remittance of orders to the transfer agent in Luxembourg as set out in the relevant annexes to the prospectus. You may be required to submit your orders to your financial advisor or fund distributor by an earlier cut-off time.

Correlation and annualised volatility

Correlation shows how a fund's return moves in relation to the benchmark. Highly correlated investments tend to move up and down together while this is not true for investments with low correlation. Standard deviation or annualised volatility is a measure of historical volatility. It is calculated by comparing the average return with the average variance from that return.

Inception date

The inception date is the date taken into account for the start of performance calculation. On the launch date, all assets were transferred to the current sub-fund in exchange for shares of the current sub-fund.

Maximum drawdown

The largest loss measured from peak to trough until a new peak is attained.

NAV

An acronym of net asset value.

Ongoing charges (OCR)

Ongoing charges are based over 12 months of expenses ending the 31 December of the previous year. It is annually updated, but may be adjusted more frequently.

Sharpe ratio

The Sharpe ratio shows the fund's risk-adjusted performance. It is calculated by dividing the excess return (portfolio return minus risk free return) by the volatility.

SRI

The Summary Risk Indicator is a guide to the level of risk of this product compared to other products. The risk of the product may be significantly higher if held for less than the recommended holding period.

Swing pricing

Swing pricing is an anti-dilution technique which protects long term investors from the direct and indirect costs of capital activities in the fund. The long-term performance of the fund is maintained with this solution.

Tracking error

The volatility of the fund's excess returns over its benchmark returns. It quantifies how closely a manager's return pattern follows that of the benchmark.

Long Exposure

The long exposure measures the sum of all long positions in percentage (long book).

Short Exposure

The short exposure measures the sum of all short position in percentage (short book).

Gross Exposure

The gross exposure measures the absolute level of a fund's investments and is the sum of all long & short positions in percentage.

Net Exposure

The net exposure measures the difference between all long positions minus all short positions in percentage. A fund is said to have a net long exposure if the long positions exceed the short positions. A net short position occurs when the short positions exceed the long positions.
